

Polymer Extrusions offer a wide variety of sizes of Shaker Screen Protectors, also called Screen Channels, Buffer Strip, Bucker Up Strip and Screen Cloth Protector.

We can produce any size required not listed in round top or flat top. We offer heavy duty top thickness for extra wear and longer life.

The Shaker Screen Channel will increase the life of your screens by offering a cushion between the bar frame and your screen cloths which reduces wear on both metal components greatly reducing maintenance costs and replacement downtime.

- **Abrasion Resistant**
- **Resists Tears & Cuts**
- **Impact Resistant**
- **Positive Gripping Action**

Our Shaker Screen Protector Channels Protects shaker screens by preventing metal-against-metal deterioration and absorbing shocks caused by materials falling on the screen. They also serve to keep the screen cloth in place.

Round Top U Channel  
70 +/- 5 Duro EPDM  
Standard 100 ft Coils
